

## CONCEPT EXAMINATION

### „ELBPILHARMONIE“, HAFENCITY HAMBURG

Source: Genius Loci Grundstücksentwicklungsgesellschaft mbH

Client: GHS Gesellschaft für Hafen- und Standortentwicklung mbH, Hamburg (today: HafenCity Hamburg GmbH)

Year: 2003

Location: HafenCity Hamburg, Germany

#### Brief Description:

In the context of the HafenCity development the building of a second concert hall for the city of Hamburg was considered. Two available potential locations should be examined.

The architects Herzog & de Meuron submitted the concept „Elbphilharmonie“ with the concert hall, completed by a hotel and living facilities, on the roof of the existing storehouse Kaispeicher A.

The task of Wenzel Consulting – in cooperation with Quickborner Team GmbH, Hamburg – consisted in evaluating the micro locations as well as investigating the chances and risks of the project "Elbphilharmonie".

The examination of the building and carrying construction of the "Elbphilharmonie" was carried out by Ingenieurbüro für Bauwesen Weber · Poll, Hamburg.

The construction work for the ambitious project Elbe Philharmonic Hall started in spring 2007. The topping out ceremony for the concert hall took place on 2010, May, 29<sup>th</sup>.

Tasks:

- Examination and Evaluation of the Location
- Functional Check
- Examination of the Surfaces
- Examination of the Construction Costs
- Estimation of the Operating Costs
- Economic Examination of the Concept
- Implementation of Expert Interviews
